ABOUT US

Started in 2004 by a team of professionals, the Company has strived to become a leading consultant in the Marine Industry and the first choice supplier to the Shipbuilding Industry by setting up high standards in marine equipment Sales and Servicing. Today, the company is also a specialist in providing all the necessary equipments and technical consultancy for New Builds.

We, at Technology Ventures Middle East, provide integrated technology solutions in the areas of Marine, Automation, and Control Instrumentation. To ensure that our customers have the latest in technology, total integrated solutions are provided by supplying products from well known brands in the respective areas. We also undertake service and maintenance.

We understand that our Customers' needs and expectations are guided by their market needs and trends. We work closely with our Customers as consultants to ensure that their needs and expectations are built to practical solutions, suggest instrument or system that gives the best value for money, configure them, supply, install and commission the solutions and take care of the maintenance.

The latest certification standard of the International Organization for Standardization: ISO 9001:2008 is the quality management systems certification for quality assurance in trading, commissioning and servicing of marine equipments.
